

# Cherish FertilityCare™

Featuring NaProTECHNOLOGY®  
(Online Instructor)

Did you know that your body has an authentic language of health and fertility?  
How would you like to use a family planning system that gives you all the information needed to decide together?  
Would you like to know more about your body?  
Are you having any gynecological health issues and want answers?

The Creighton Model FertilityCare™ System involves learning about your fertility cycle and the signs your body gives of the natural changes throughout this cycle. Couples can then use this information to either achieve or avoid pregnancy and to monitor gynecological health. Women can use this information to monitor gynecological health & deal with any underlying issues.

This will work for every situation for your entire reproductive lives!

First you learn to track your biomarkers.

There has been a breakthrough in Women's health NaProTECHNOLOGY®. NaProTECHNOLOGY® (Natural Procreative Technology) is a new women's health science that monitors and maintains a woman's reproductive and gynecological health. It provides medical and surgical treatments that cooperate completely with the reproductive system.

Instruction is available via long distance and in French.

## Benefits of the Creighton Model - What are some benefits of the Creighton Model?

- No devices or drugs to use that harm the body or a couple's fertility
- Safe, healthy, natural
- It teaches couples to understand their bodies and their combined fertility
- Proven effectiveness to achieve and avoid pregnancy also for couples with infertility
- Is "reversible"—a couple can change their family planning goals whenever they wish
- Research shows that couples who switch to a natural method of family planning improve their relationships, and feel more respected by their partners and more in control of their fertility
- It is *inexpensive, highly reliable* & cooperates with the couple's own natural fertility process
- It is a *shared method* of fertility regulation
- Treats fertility as a *normal and healthy process*
- It is a system that is firmly based in a respect for human life, human dignity, and the integrity of marriage

## Creighton Model **FertilityCare** System and NaPro**TECHNOLOGY**® (In person Instructor)

The **FertilityCare** System teaches a woman and couple to identify the fertile and infertile days in her cycle using the Creighton Model. The couple then uses this information to plan or avoid a pregnancy. The System is based on the observation and tracking of physical signs a woman has when she is fertile. The **FertilityCare** System has a 99.6% degree of effectiveness to avoid pregnancy and a very high degree of accuracy in achieving pregnancy. As an additional benefit, couples report that their communication increases. Women express appreciation that this method also involves the couple and that it helps her to understand her body.

Through NaPro**TECHNOLOGY**®, a reproductive science that has its roots in the CREIGHTON MODEL **FertilityCare** System, trained medical consultants can assist women with infertility, repeated miscarriages, PMS, ovarian cysts, menopause, and a variety of reproductive issues. The standardized charting provides a tool to identify indicators of problems. When these are identified, treatments can be prescribed that are founded in an understanding of what is actually occurring in the woman's cycle.

The **FertilityCare**™ System provides new hope for couples who are going through the experience of infertility or low fertility. Not only does this system inform couples of when they are most fertile, it also aids in identifying factors that may be contributing to infertility. Women no longer rely on the calendar to determine where they are in their cycle resulting in more accurate diagnostic testing.

*Please note: Couples will receive the **Introductory Session** to the Creighton Model **FertilityCare** System and NaPro**TECHNOLOGY**® at the Fertility Health Awareness Seminar. Further follow-up sessions will be necessary to continue learning the System after the Seminar (at cost to the couple).*

### **Presenter at the Fertility Health Awareness Seminar:**

Alison Sanders, MN, RN(NP), NFPNPI, FCPI (In person Instructor)
